LEXMARK *E 220* ™

Small business, small budget?

Make a big impact with your documents! Lexmark's E220 personal A4 mono offers both home office and small and medium-size business an affordable path to professional, high-quality output. Reliable and easy to use, it delivers excellent 1200 Image Quality resolution and a wide range of performance features to help you stay productive. With the E220, "business as usual" is unusually efficient!

Affordable business advantages

The E220 eliminates waiting for the first page. Equipped with a 100 MHz processor, it offers fast 17 ppm output with less than 9.5 seconds time-to-first-page. PCL5e support lets your PC work on something other than printing. It also supports a broad range of media, including envelopes, labels, cardstock and transparencies. And thanks to its high-yield replacement cartridges, it requires minimal intervention from you.

More features and flexibility

With a job cancellation button directly on the operating panel, you can terminate jobs instantly with just the touch of a button. The E220 is easily upgradeable thanks to a wide range of options, including more memory (72MB max), an additional 250-sheet input drawer and an external print server for network printing.
