Quick Start Guide

This guide provides first-time users with information on taking photographs with the D80, on copying photographs to a computer, and printing photographs. Complete information on using your Nikon digital camera can be found in the Nikon Guide to Digital Photography with the D80 and the PictureProject reference manual (on CD).

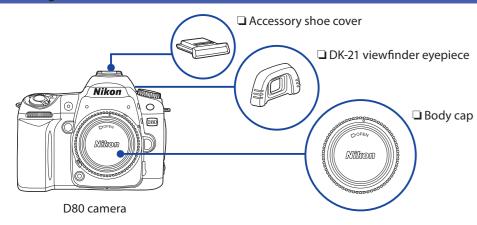

Digitutor

"Digitutor," a series of "watch and learn" manuals in movie form, is available at the following website: http://www.nikondigitutor.com/index_eng.html

Package Contents

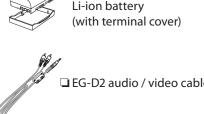

Confirm that the package contains the items listed below. Purchasers of the lens kit option should confirm that the package also includes a lens. Memory cards are *not* provided; please use one of the memory cards listed on page 122 of the Guide to Digital Photography.

The following items are found on the camera:

The following items are included with the camera:

- ☐ *Quick Start Guide* (this guide) ☐ Guide to Digital Photography ■ Warranty
- ☐ PictureProject installer CD (gray) ☐ PictureProject reference CD (silver)

☐ EN-EL3e rechargeable

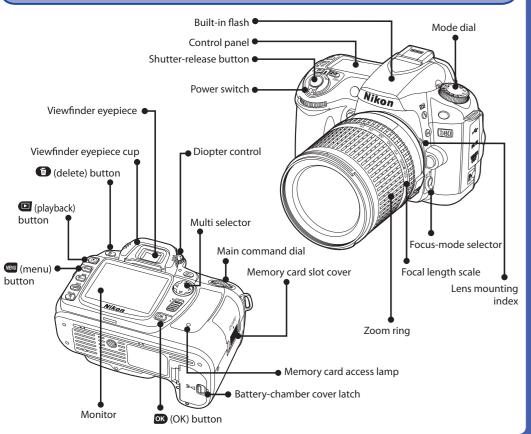

☐ DK-5 eyepiece cap (for use with self-timer; clips to strap)

☐ MH-18a Quick Charger

(with power cord*)

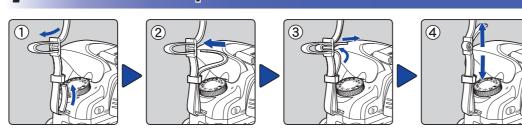

Parts of the Camera

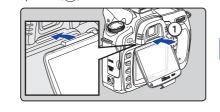

Setup

Attach the Strap

2 Attach the Monitor Cover

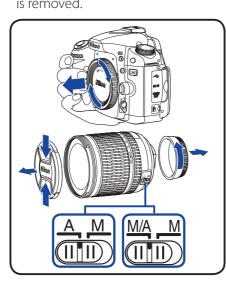

To attach the cover, insert the projection on the top of the cover into the matching indentation above the camera monitor $(\widehat{1})$, and press the bottom of the cover until it clicks into place ((2)).

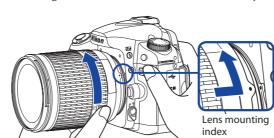

3 Attach a Lens

Care should be taken to prevent dust from entering the camera when the lens or body cap

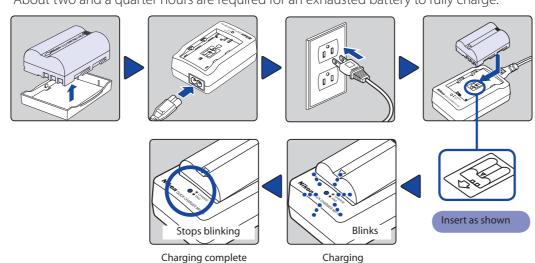

Keeping the mounting index on the lens aligned with the mounting index on the camera body, position the lens in the camera's bayonet mount and rotate the lens in the direction shown until it clicks into place.

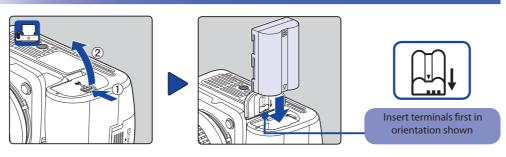

If the lens is equipped with an A-M or M/A-M switch, select A (autofocus) or M/A (autofocus with manual priority).

4 Charge the Battery

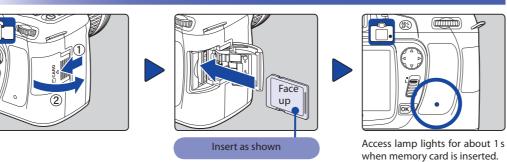

About two and a quarter hours are required for an exhausted battery to fully charge.

5 Insert the Battery

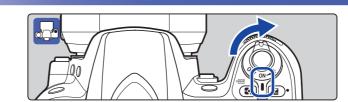

6 Insert a Memory Card (Available Separately)

Slide the memory card in as shown

above until it clicks into place.

Turn the Camera On

8 Choose a Language and Set the Clock

A language-selection dialog will be displayed the first time the camera is turned on. Follow the steps below to choose a language and set the camera clock.

Display map of world time zones.

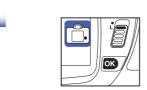

Select local time zone.

Display Daylight saving time options.

Highlight **On** if daylight saving time is in effect.

Set clock and return to shooting mode Monitor will turn off automatically.

9 Format the Memory Card

Display Date menu. Press multi selector left or

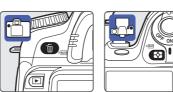

* To change the order in which the year, month, and day are

menu (see page 103 of the Guide to Digital Photography).

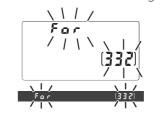

displayed, select **World time > Date format** from the setup

right to select item, up or down to change.

To format the card, turn the camera on and hold the 🚾 (🐿 and 🕙) buttons down simultaneously for approximately two seconds. A blinking $F_{\Omega} r$ will appear in the shutterspeed display and the frame count will blink. Pressing both buttons together a second time will format the memory card. Press any other button to exit without formatting.

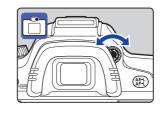

During formatting, the letters **F** α r will appear in the frame-count display. When formatting is complete, the frame-count display will show the number of photographs that can be recorded at current settings.

- Formatting memory cards permanently deletes any data they may contain. Be sure to copy any photographs and other data you wish to keep to a computer before proceeding.
- Do not remove the card or battery or unplug the AC adapter (available separately) during

10 Focus the Viewfinder

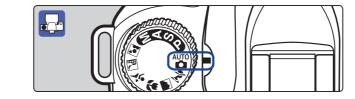

Focus brackets

Rotate the diopter adjustment control until the focus brackets are in sharp focus. When operating the diopter adjustment control with your eye to the viewfinder, be careful not to put your fingers or fingernails in your eye.

Taking Photographs

Rotate the Mode Dial to AUTO

2 Set the Focus-Mode Selector to "AF"

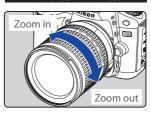

3 Ready the Camera Hold the hand-grip with your right hand Keep yourelbows in Support the lens with your left hand half a pace in front of the other

4 Frame a Photograph

Frame a photo in the viewfinder with the main subject positioned in any of the eleven focus areas.

Use the zoom ring to zoom in on the subject so that it fills a larger area of the frame, or zoom out to increase the area visible in the photograph (select longer focal lengths on the lens focal length scale index to zoom in, shorter focal lengths to zoom out).

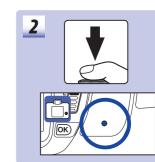

5 Focus and Shoot

Press the shutter-release button halfway to focus. The camera will select the focus area automatically. If the subject is dark, the flash may pop up and the AF-assist illuminator may light.

When the focus operation is complete, the selected focus areas will be briefly highlighted, a beep will sound, and the in-focus indicator (•) will appear in the viewfinder. Focus will lock while the shutter-release button is pressed halfway.

Smoothly press the shutter-release button the rest of the way down to release the shutter and record the photograph. The access lamp next to the memory card slot cover will light. *Do not eject the memory card or remove or disconnect* the power source until the lamp has gone out and recording is complete.

6 View the Results

Photographs are automatically displayed for about four seconds after shooting. If no photograph is displayed in the monitor, the most recent picture can be viewed by pressing the 🖭 button. Additional pictures can be displayed by pressing the multi selector left or right or rotating the main command dial.

To end playback and return to shooting mode,

To delete the photograph currently displayed in the monitor, press the **6** button. A confirmation dialog will be displayed. Press the fine button again to delete the image and return to playback. To exit without deleting the picture, press the

For more information on taking photographs and other camera operations, see the Guide to Digital Photography. See the other side of this guide for information on using the supplied PictureProject software to copy photographs to a computer, and printing photographs via direct USB connection.

Installing PictureProject

This section describes how to install PictureProject and copy photographs to a computer. PictureProject can also be used to view, edit, and organize photographs. See the PictureProject Reference Manual (on CD) for more information.

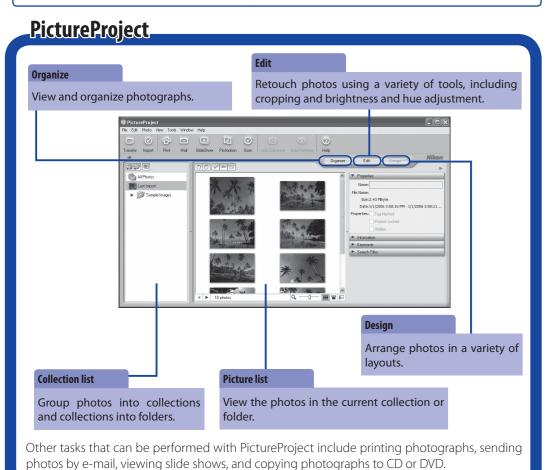

Viewing the PictureProject Reference Manual

1 Start the computer and insert the silver reference CD.

2 Double-click the CD icon.

• Windows: Double-click the CD (Nikon) icon in My Computer. • Macintosh: Double-click the CD (Nikon) icon on the desktop.

3 Double-click the **INDEX** or **INDEX.pdf** icon to display a language selection screen. Click a language to display an index of the documentation available for PictureProject and click a title to view.

PictureProject requires Mac OS X (version 10.3.9 or later, PowerPC G4/G5) or a pre-installed version of Windows XP Home Edition, Windows XP Professional, Windows 2000 Professional

furn off any virus-protection software and exit all other application efore beginning installation

og on to an account with administrator privileges when installing sing, or uninstalling PictureProject.

Before connecting the camera, be sure that PictureProject nstalled. If the Windows hardware wizard is displayed when th camera is connected, click Cancel to exit the wizard

Installing Picture Project (Windows)

The illustrations in this section are intended as a guide only. The dialogs and messages displayed during installation may differ in some respects from those shown here.

Before Installing PictureProject

Turn the computer on and insert the PictureProject installer CD into the CD-ROM drive. The Install Center program will launch automatically. A language-selection dialog will be displayed. Select a language and click Next.

If the "Select Language" Dialog Is Not Displayed

Open "My Computer" by selecting **My Computer** from the **Start** menu (Windows XP) or by double-clicking the **My Computer** icon on the desktop (Windows 2000) and then double-click the CD (PictureProject) icon.

- Click Easy Install to begin installation of:
- Drivers for D1-series cameras Apple QuickTime 7
- Nikon FotoShare (Europe only)
- PictureProject

Click Yes

- Camera Control Pro Updat
- Microsoft DirectX 9

Capture NX Free Trial

Click Capture NX Free Trial in the Install Center window to open your web browser to a site where you can download a trial version of Capture NX (Internet connection required).

Follow the on-screen instructions to install the drivers for D1-series cameras.

Click Quit.

Apple QuickTime If an earlier version of QuickTime is installed, the QuickTime installer will start. Follow the on-screen instructions to complete installation. On some systems, the QuickTime installer may require considerable time to complete installation.

Click **OK**. If a dialog is displayed directing you to restart the computer, follow the on-screen instructions.

If the computer restarts, log in to the account used to install PictureProject. To install Nikon FotoShare (Europe only), open the "FotoShare" folder on the PictureProject installer CD and drag the Nikon FotoShare icon to the "Applications" folder on the hard disk.

Remove the PictureProject installer CD from the CD-ROM drive. This completes installation of PictureProject. Proceed to "Viewing Photographs on a Computer."

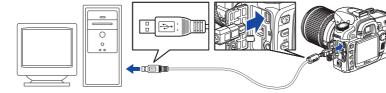

Viewing Photographs on a Computer

The illustrations in this section are from Windows XP.

Use a Reliable Power Source

Nikon recommends using the optional EH-5 AC adapter to power the camera for extended periods. Do not use another make or model of AC adapter.

Turn the camera off and connect the supplied UC-E4 USB cable as shown below. Do not use force or attempt to insert the connectors at an angle. Connect the camera directly to the computer; do not connect the cable via a USB hub or keyboard.

Turn the camera on. PictureProject will automatically detect the camera and the PictureProject Transfer window will be displayed in the computer monitor. Click **Transfer** to copy all photographs from the camera memory card to the computer.

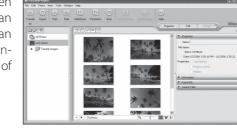

Windows XP

The dialog shown at right will be displayed when the camera is turned on. Select Copy pictures to a folder on my computer **using PictureProject** and click **OK**. To bypass this dialog in future, check **Always do the selected action**.

The photographs will be displayed in PictureProject when transfer is complete.

PictureProject periodically checks for updates when the computer is connected to the Internet. If an update is detected when PictureProject starts, an update dialog will be displayed. Follow the onscreen instructions to update to the latest version of PictureProject.

Disconnecting the Camera

Before turning the camera off and disconnecting the USB cable, remove the camera from the sys-

tem as described below. Windows XP Home Edition/Professional: Click the "Safely Remove Hardware" (🔊) icon in the taskbar

and select **Safely remove USB Mass Storage Device** from the menu that appears. Windows 2000 Professional: Click the "Unplug or Eject Hardware" (😤) icon in the taskbar and select **Stop USB Mass Storage Device** from the menu that appears.

Macintosh: Drag the camera volume ("NIKON D80") into the Trash.

See page 67 of Guide to Digital Photography for details.

Printing Via Direct USB Connection

JPEG photographs can be printed directly from a camera connected to a PictBridge printer (RAW /NEF photographs can not be printed by direct USB connection). See page 69 of Guide to Digital Photography

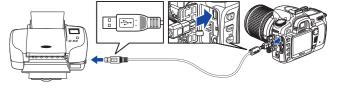

Press button to set USB in the SETUP MENU. Set the USB option to PTP.

Turn the camera off.

Connect the UC-E4 USB supplied cable as shown. Do not use force or attempt to insert the connectors at an angle. Connect the camera directly to the printer; do not connect the cable via a USB hub or key-

Turn the camera on. A welcome screen will be displayed, followed by

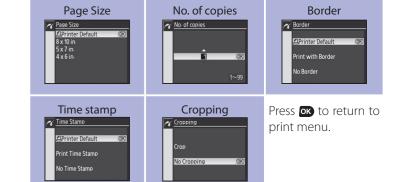

Press the multi selector left or right to view additional photographs, or press the 🗨 button to zoom in on the current photo. To view six photographs at a time, press the 🔁 button. Use the multi selector to highlight photographs, or press
to display the highlighted photograph full frame.

To print the picture currently selected in the PictBridge playback display, press ox button. The menu shown at left will be displayed. Press the multi selector up or down to highlight an option and press to the right to select.

To start printing, highlight **Start Printing** and press **S** button. The PictBridge playback display will be displayed when printing is complete. To cancel and return to the PictBridge playback display before all im-

ages have been printed, press or button again.
