## Highlights

### **Ambilight Spectra XL**

Ambilight Spectra XL enlarges the screen even further by projecting a glow of light that automatically changes according to the screen, from the back of the screen onto the surrounding wall. The colors of the halo support both relaxed and dynamic scenes, with a larger effect than before. The wall adaptive function ensures that the color of the light always matches the picture, no matter what the color of your wall is. Get the bigger picture with Ambilight.

### 3D Max

Be enthralled by 3D movies in your own living room with the 3D Max. The combination of the fast display and Active shutter glasses bring real life depth in Full HD resolution. Now all 2D content can be experienced in 3D and you can even control the depth of the 3D to your liking. Your TV is ready for the 3D Max experience by adding the 3D Max glasses PTA516 and a 3D compatible BluRay player (Accessory Philips PTA516 sold separately).

### **Moth Eye**

Moth Eye is inspired by the perfection of natural evolution by using special nanostructures as found in a Moth's eye. Known as the most perfect anti-reflective surface, a Moth's eye do not have reflections, enabling it to keep hidden from predators. The anti-reflective surface properties of the Moth Eye extend the image contrast by deepening the blackness of dark tones, while increasing output of bright elements without halos or reflectons. Enjoy a true to life contrast with incredible brilliant detail.

### **Full HD LED Pro**

Full HD LED Pro delivers extreme contrast and the world's most vivid 3D images. Enjoy breathtaking pictures and use up to 50% less energy with Philips award winning LED Pro! In the sleek thin design over 1000 LED's operate selectively in the display backlight. They generate brilliant light in bright image areas, and are dimmed completely in dark areas for the deepest black. Combined with the powerful Perfect Pixel HD Engine, the result is a stunning picture with extreme contrast, sharpness and vibrant color. With LED Pro black is black and white is bright.

### 1200Hz Perfect Motion Rate

1200Hz Perfect Motion Rate (PMR) creates extreme motion sharpness for clear and vibrant images in fast action movies. The new Philips PMR standard shows the combined visible effect of the fastest panel refresh rate, Perfect Natural Motion and unique processing formula, for unprecedented motion sharpness

### **Smart TV**

Smart TV for an easier & wireless TV experience in 4 areas. Net TV lets you enjoy a wealth of online apps on your TV: rent movies, watch cat-up TV and enjoy social media. Stay in Control: change channels or enter text using your Smartphone or tablet. Use SimplyShare to enjoy photos, music and video from your computer, phone & tablet on your TV. ### **Energy Class A**

For many years Philips has pro-actively been working on the reduction of both on-mode and standby power consumption of its televisions and as a result most Philips televisions has achieved green EU energy labels in 2010. The greener the label, the lower the onmode power consumption and the lower your energy bill and friendlier to the environment.
