1 Pick a Spot for Your Radio

Install the Dash or Vent Mount

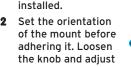

Installing the Dash Mount:

dealer if you are unsure about your dash surface), and make sure the air temperature is at least 60°F (15°C) during installation. If it's not at least 60°F, turn on the heater in your vehicle to bring the temperature up to 60°F.

Locate a flat surface for the Dash Mount. (Options 1, 2, or 3.) Make sure there is ample room for the dock and radio when

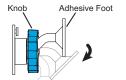

Clean the surface with the alcohol preparation pad, and let it dry thoroughly.

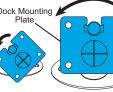

The dock mounting plate can be tilted in different directions. Adjust as necessary for your particular vehicle. When the

You can use either the Dash Mount or the Vent Mount for your Stratus 6, depending upon your vehicle and the location where you want to place your radio.

CAUTION! Make sure your radio isn't in a place where it could interfere with driver visibility or safe deployment of the airbags.

Option 3

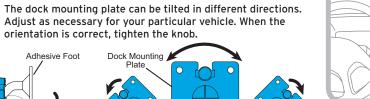

the adhesive foot for the location you

Attach the Dash Mount to the

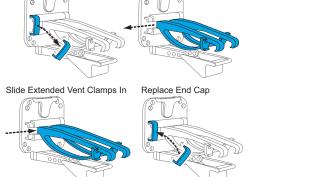

Pick a Spot for Your Radio (continued)

Installing the Vent Mount:

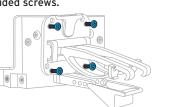

2 If the vent louvers are recessed, you'll have to use the extended vent clamps. The Vent Mount is assembled with the short vent clamps, so you will have to remove the short clamps and install the extended clamps as shown below.

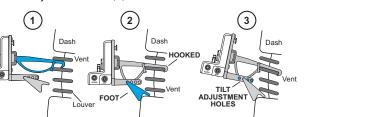

Remove End Cap Slide Short Vent Clamps Out

Attach the Vent Mount to the PowerConnect Vehicle Dock using the provided screws.

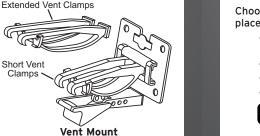

4 Push the Vent Mount onto the vehicle vent as shown (1) until hooked on the rear of the vent louver (2).

Mount the Magnetic Mount Antenna

2 Install the Magnetic Mount Antenna

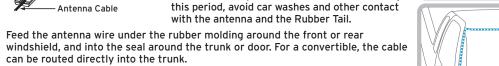

Option 5

— Antenna Cable

Clean the surface of the selected mounting location using the alcohol preparation pad and let it dry thoroughly. Peel the protective material from the adhesive strips and press the Rubber Tail firmly into place on the vehicle for 30 seconds. At room temperature (68° F), maximum adhesion usually occurs within 72 hours. During

The best place to hide your antenna cable depends on your type of vehicle.

When the antenna is mounted at the rear of the vehicle, it's usually easiest to run the cable from the rear to the front toward the radio by routing the cable along the interior trim where it meets the carpet, gently pushing it behind the edges of the trim. Bring the cable out from the trim and route it under the carpet toward

When the antenna is mounted at the front of the vehicle, bring the cable into the rubber weather stripping around the door to the bottom of the door opening. Bring the cable out of the weather stripping and route it under the carpet toward the dashboard.

Coil any excess cable in a hidden location, such as under the carpet, keeping it away from any vehicle pedals or controls. Secure the excess cable with wire ties.

Plug the antenna into the silver ANT connection on the

3 Connect the Audio to Your Vehicle's Stereo

Best: Use the Aux In Cable if your vehicle's stereo system has

an auxiliary input connection. Plug one end of the cable into the

green AUDIO connector on the PowerConnect Vehicle Dock and

the other end into the vehicle stereo system's auxiliary input jack.

Better: Use a Cassette Adapter if your vehicle has a built-in cassette

the Cassette Adapter into the vehicle's cassette deck. Set the stereo

system to play from the cassette source.

player, Cassette Adapters are sold separately. Plug the Cassette Adapter

into the **green AUDIO** connector on the *Power*Connect Vehicle Dock. Insert

Good: Use the PowerConnect feature in the Stratus 6. PowerConnect

Set the stereo system to play from the auxiliary input source.

You will listen to the Stratus 6 through your vehicle's stereo system or FM radio. First, the Stratus 6 must be receiving the

SIRIUS signal. Ensure your vehicle is outside with the antenna having a clear view of the sky. Your audio connection options are:

Decide How to Connect

Choose the best location for the antenna considering your vehicle type. Refer to the antenna placement tips and cautions in the User Guide beginning on page 23.

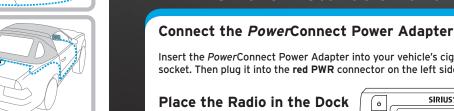

- Sedan or Coupe: We recommend mounting the antenna above either the front windshield or the back window.
- Pickup Truck: We recommend mounting the antenna above the front windshield.
- Convertible: We recommend mounting the antenna at the leading edge of the trunk.
- SUV: We recommend mounting the antenna at the rear of the roof

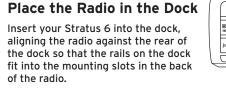

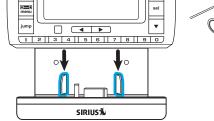

Press the Power button to turn it On.

5 *Power*Connect

If you have connected the audio in step 3 using the Aux In Cable or Cassette Adapter, continue with step 6.

Tune the Stratus 6 and Vehicle FM Radio to the Same FM Channel

1 Find an Available FM Channel in Your Area

2 Tune vour Vehicle's FM Radio

a Pick the first FM channel on your list.

3 Set Your Stratus 6 to Transmit on the Same FM Channel

a Press and hold menu until the menu options are displayed.

b Press ▼ to scroll to and highlight FM Settings and press the Select button.

• Tune to the FM channel you found in step 1. Press ▼ and ▲ to tune in

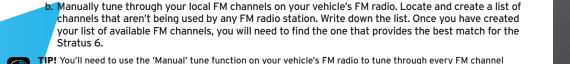

99.3 to 100.3. Press the **Select button** to select the FM channel.

steps of .2. i.e., 99.3 to 99.5. Press \P and P to tune in steps of 1, i.e.,

d Press very to scroll to and highlight the storage location FM2. Press the Select button

An available FM channel is one that's not being used by an FM radio station in your area. When you tune your FM radio to an available channel, you should only hear static or silence - not talk or music. We recommend one of the following methods to find an available FM channel:

a. Use the SIRIUS | XM FM Channel Finder at www.sirius.com/fmchannel. Go to the website and enter your zip code. The Channel Finder will suggest a list of available FM channels in your area. For convenience, write down or print out the list.

to tune through each FM channel one-by-one (88.1 followed by 88.3 etc.) to locate channels that aren't being used by

one-by-one. Turn on your vehicle's FM radio. Start at 88.1 and use the 'Manual' tune function on your vehicle's FM radio

a local FM radio station. Write down each FM channel that has only static or silence on it, until you reach 107.9.

b Turn on your vehicle's FM radio (if you have not already done so) and tune it to this FM channel.

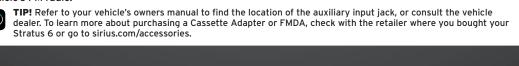

plays the audio through your vehicle's FM radio. When you have finished step 4 (below), you'll first need to find an available FM channel in your area, and then you need to ensure that the Stratus 6 and your vehicle's FM radio are tuned to the same available FM channel. (Step 5)

FM Direct Adapter (FMDA)

PowerConnect

Cassette Adapter

Best: Use an FM Direct Adapter (FMDA) if none of the above three audio connection options works in your vehicle. The FMDA needs to be installed by a professional installer and directly connects the Stratus 6 to your vehicle's FM radio.

4 Finish the Installation and Power On

Insert the PowerConnect Power Adapter into your vehicle's cigarette lighter or power adapter socket. Then plug it into the **red PWR** connector on the left side of the dock.

g You should hear SIRIUS through your vehicle's radio when Stratus 6 is tuned to channel 184. If you are satisfied with the sound quality, you're FM3 Empty

PowerConnect (continued)

4 You May Need to Try Other FM Channels on Your List

If the chosen FM channel doesn't work well for you, work down the list of FM channels until you find one that allows you to hear SIRIUS clearly. Each time, you will need to tune your vehicle's FM radio and the Stratus 6 to the same FM channel.

TIP! You may find an FM channel with static or silence that does not work with the Stratus 6. It is possible that some type of inaudible interference is present that prevents reception of the Stratus 6 broadcast. Your only options are to use another FM channel or a different audio connection method.

6 Activate

Activate Your Service

Before you can enjoy Commercial-Free Music, Plus Sports, News, Talk & Entertainment, you need to activate

- Make sure your Stratus 6 is properly installed, turned on, and receiving the SIRIUS signal so that vou can hear the audio on channel 184.
- Make a note of your SIRIUS Radio ID. You can find it:
- On channel O (zero)
- On a label on the bottom of the gift box
- On the label on the back of your Stratus 6
- Activate your service:
- Online: Go to www.sirius.com and click on "Install and c If FM Channels is not highlighted, press A to highlight FM Channels. Press the Select button.

FM Channels

- By phone: Call 1-888-539-SIRIUS (1-888-539-7474)
- When your service is activated, your Stratus 6 will display an alert message. To continue, press any button. Thereafter, if you press or vou can scroll and tune other channels. Activation usually takes less than 5 minutes, but sometimes may take longer. We recommend that your radio remain on until activated.

Signal. Press the Select

TIP! If the signal reception

is low, check to see if the

antenna's view of the sky is blocked by a tree, a

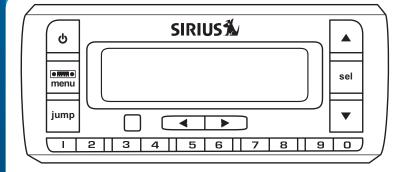

> uggage container, etc. Adjust until you are receiving a good signal. To check the signal, press and hold menu, press T to scroll to and highlight
