

What's in the Box?

CAUTION: Do not attempt to install, activate, or adjust any of the setting options described in this Quick Start Guide unless your vehicle is parked in a safe location.

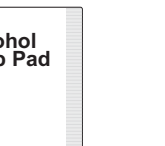

Snap Radio

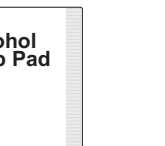

Magnetic Mount Antenna

Aux In Cable

Cable Routing Adapter

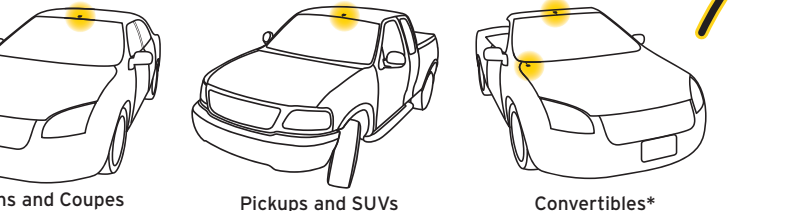

Antenna Alcohol Preparation Pad

1 Mount the Magnetic Mount Antenna

A. Mount the Magnetic Mount Antenna outside your vehicle, on a clean and dry horizontal surface that will always face the sky.

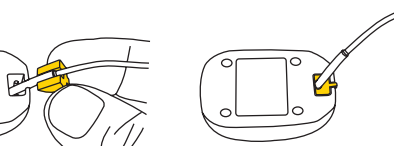

B. The best location is on the roof above the front windshield, centered between the left and right sides.

Sedans and Coupes Pickups and SUVs Convertibles*

* If the antenna can not be placed above the windshield, place it on vehicle hood.

C. Install the Cable Routing Adapter to direct the antenna cable downward, if mounting on an edge.

TIP: Use the Alcohol Prep Pad to clean the surface.

2 Route the Antenna Cable

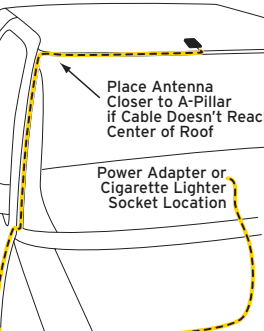

A. Tuck the antenna cable under the windshield rubber molding and run it to the nearest corner.

B. Route the cable out of the molding and into the rubber weather stripping around the door opening.

C. Lift the weather stripping. Tuck and run the cable inside it to the bottom of the door opening. Replace the weather stripping.

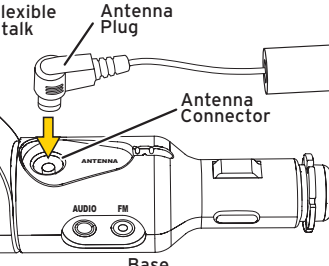

D. Pull the cable out and route it toward the power adapter or cigarette lighter socket location.

E. Plug the Magnetic Mount Antenna connector into the **ANTENNA** connector on the Base of Snap.

Place Antenna Closer to A-Pillar if Cable Doesn't Reach Center of Roof

Power Adapter or Cigarette Lighter Socket Location

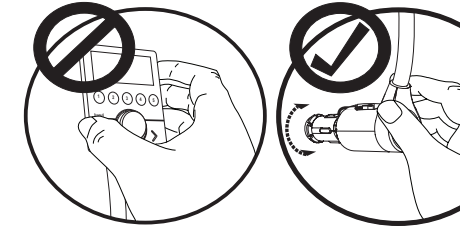

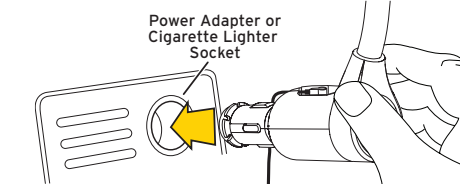

Flexible Stalk Antenna Plug Antenna Connector Base

3 Find a Location for Snap and Mount It

A. Mount Snap by plugging the Base into the power adapter or cigarette lighter socket.

B. Grasp the rear of Snap's Base and gently push in, while at the same time rotating the Base slightly to the right and then to the left. Do not push it in by holding the Radio Control Unit or Flexible Stalk.

TIP: Choose a socket that doesn't interfere with the driver's vision or access to driving controls, won't interfere with the deployment of airbags or other safety equipment, and makes Snap easily accessible for operation.

4 Initiate the Courtesy Period

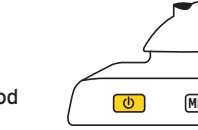

A. Power on your Snap by pressing the **Power button**. Ensure the vehicle is outside and the antenna has a clear view of the sky.

B. When prompted, press the number button **1**, then **2**, then **3**. The **Courtesy Period Begun** message will verify that the Courtesy Period has begun.

C. You will be notified about the length of the Courtesy Period and prompted to set up the audio connection. Snap will then tune to channel 1.

TIP: At this point, you should have access to all the channels in a few minutes. However, leave Snap tuned to channel 1 until you have set up the audio connection.

NOTE: If **Acquiring Signal** or **Chk Antenna Connection** is displayed, verify that you have mounted and connected the antenna. Refer to "Mount the Magnetic Mount Antenna" on page 14, or to "Troubleshooting" on page 42 of the User Guide for additional help.

Courtesy Period Begun

5 Connect the Audio

Decide on one of the following in-box audio connection options. Refer to "Connect the Audio" on page 23 of the User Guide for details including other connection options.

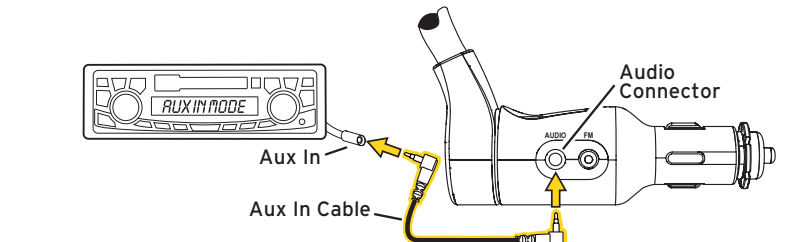

Option 1: Best: Use the provided **Aux In Cable**, if your vehicle's stereo system has an auxiliary input jack.

A. Plug one end of the cable into the **AUDIO** connector on Snap and the other end into the auxiliary input jack on the vehicle's stereo system.

B. Turn on your vehicle's stereo system and set it to play from the auxiliary input source.

C. You should now hear the XM channel 1. The installation is complete.

TIP! Refer to your vehicle's owner's manual to find the location of the auxiliary input jack, or consult the vehicle dealer.

Connect the Audio (continued)

Option 2: Good: Use the **PowerConnect™** feature of Snap. **PowerConnect** plays the XM audio through your vehicle's FM radio.

A. Find and make a list of all available FM channels in your area that are not being used by an FM radio station.

B. Pick the first FM channel on your list. Tune your vehicle's FM radio to this FM channel.

C. Set your Snap to transmit on the same FM channel that you have selected on your vehicle's FM radio:

i. Press **FM** on the top of Snap.

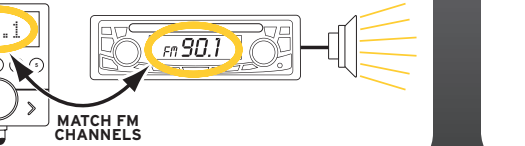

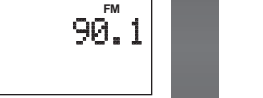

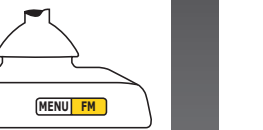

ii. Turn the **Rotary knob** to select the available FM channel you have chosen.

D. You should hear XM channel 1 through your vehicle's FM radio. If you are satisfied with the sound quality, the installation is complete.

E. If you are not satisfied, move to the next FM channel on your list and repeat the process. Continue until you have found an FM channel with which you are satisfied.

F. Press **FM** or wait 10 seconds to exit the FM mode.

TIP: Refer to "PowerConnect Installation Instructions" on page 25 of the User Guide for details on how to find an available FM channel.

6 Explore, Enjoy and Subscribe

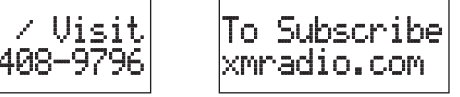

Once installation is complete, you can tune to other channels and listen to all the commercial-free music, plus live sports and the latest news, talk & entertainment on XM.

A. Turn the **Rotary knob** to tune to other channels and press the **Previous** or **Next Category** button to browse and select the different categories.

B. Subscribe before the Courtesy Period expires. Follow the instructions displayed on the screen.

C. You can also subscribe anytime you want online or by phone. Just go to www.xmradio.com and click on **Activate Radio** or call **1-800-XM-RADIO** (1-800-967-2346).

TIP: To subscribe, you will need your Radio ID, which you can find by pressing **MENU**, on a label on the bottom of the gift box, on the label on the back of your Snap, and by tuning to channel 0.

Snap Button Functions

Number Buttons

Press to tune to a stored favorite channel, press and hold to store a favorite channel; in FM mode, press to select a stored FM preset, press and hold to store an FM preset.

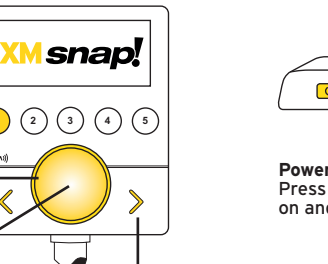

Rotary Knob

Turn to tune to the previous or next channel within the current category; in FM mode, turn to tune FM channels.

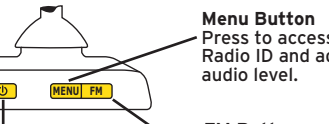

Scan Button

Press to start or stop scanning through channels within the current category.

Front View (Radio Control Unit)

Top View (Radio Control Unit)

Menu Button

Press to access Radio ID and adjust audio level.

FM Button

Press to change to FM mode for configuring FM channels.

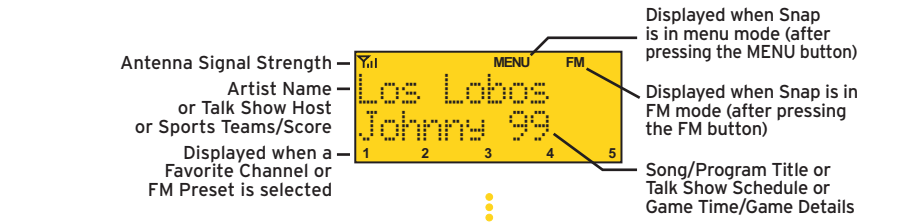

Press to turn Radio on and off.

Previous/Next Category Buttons

Press to access the previous or next category; press and hold to cycle through the categories.
