# **Copyright Notice:**

No part of this manual may be reproduced, transcribed, transmitted, or translated in any language, in any form or by any means, except duplication of documentation by the purchaser for backup purpose, without written consent of ASRock Inc.

Products and corporate names appearing in this manual may or may not be registered trademarks or copyrights of their respective companies, and are used only for identification or explanation and to the owners' benefit, without intent to infringe.

#### Disclaimer:

Specifications and information contained in this manual are furnished for informational use only and subject to change without notice, and should not be constructed as a commitment by ASRock. ASRock assumes no responsibility for any errors or omissions that may appear in this manual.

With respect to the contents of this manual, ASRock does not provide warranty of any kind, either expressed or implied, including but not limited to the implied warranties or conditions of merchantability or fitness for a particular purpose.

In no event shall ASRock, its directors, officers, employees, or agents be liable for any indirect, special, incidental, or consequential damages (including damages for loss of profits, loss of business, loss of data, interruption of business and the like), even if ASRock has been advised of the possibility of such damages arising from any defect or error in the manual or product.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

# **CALIFORNIA, USA ONLY**

The Lithium battery adopted on this motherboard contains Perchlorate, a toxic substance controlled in Perchlorate Best Management Practices (BMP) regulations passed by the California Legislature. When you discard the Lithium battery in California, USA, please follow the related regulations in advance.

"Perchlorate Material-special handling may apply, see <a href="https://www.dtsc.ca.gov/hazardouswaste/perchlorate">www.dtsc.ca.gov/hazardouswaste/perchlorate</a>"

# 1. Introduction

Thank you for purchasing ASRock **N68-VGS3 FX / N68-VS3 FX** motherboard, a reliable motherboard produced under ASRock's consistently stringent quality control. It delivers excellent performance with robust design conforming to ASRock's commitment to quality and endurance.

In this manual, chapter 1 and 2 contain introduction of the motherboard and step-by-step guide to the hardware installation. Chapter 3 and 4 contain the configuration guide to BIOS setup and information of the Support CD.

Because the motherboard specifications and the BIOS software might be updated, the content of this manual will be subject to change without notice. In case any modifications of this manual occur, the updated version will be available on ASRock website without further notice. You may find the latest VGA cards and CPU support lists on ASRock website as well. ASRock website <a href="http://www.asrock.com">http://www.asrock.com</a>

If you require technical support related to this motherboard, please visit our website for specific information about the model you are using. www.asrock.com/support/index.asp

# 1.1 Package Contents

One ASRock N68-VGS3 FX / N68-VS3 FX Motherboard

(Micro ATX Form Factor: 8.5-in x 7.0-in, 21.6 cm x 17.8 cm)

One ASRock N68-VGS3 FX / N68-VS3 FX Quick Installation Guide

One ASRock N68-VGS3 FX / N68-VS3 FX Support CD

Two Serial ATA (SATA) Data Cables (Optional)

One I/O Panel Shield

# 1.2 Specifications

| Platform       | - Micro ATX Form Factor: 8.5-in x 7.0-in, 21.6 cm x 17.8 cm       |
|----------------|---|
| CPU            | - Support for Socket AM3+ processors (see CAUTION 1)              |
|                | - Support for AM3 processors: AMD Phenom™ II X6 / X4 / X3 /       |
|                | X2 (except 920 / 940) / Athlon II X4 / X3 / X2 / Sempron          |
|                | processors (see CAUTION 2)  |
|                | - Supports 8-Core CPU   |
|                | - Supports UCC feature (Unlock CPU Core) (see CAUTION 3)          |
|                | - Supports AMD's Cool 'n' Quiet™ Technology                       |
|                | - FSB 1000 MHz (2.0 GT/s)   |
|                | - Supports Untied Overclocking Technology (see <b>CAUTION 4</b> ) |
|                | - Supports Hyper-Transport Technology                             |
| Chipset        | - NVIDIA® GeForce 7025 / nForce 630a                              |
| Memory         | - Dual Channel DDR3 Memory Technology (see <b>CAUTION 5</b> )     |
|                | - 2 x DDR3 DIMM slots   |
|                | - Support DDR3 1600/1333/1066/800 non-ECC, un-buffered            |
|                | memory (see CAUTION 6)  |
|                | - Max. capacity of system memory: 8GB (see CAUTION 7)             |
| Expansion Slot | - 1 x PCI Express x16 slot  |
|                | - 1 x PCI slot  |
| Graphics       | - Integrated NVIDIA® GeForce 7025 graphics                        |
|                | - DX9.0 VGA, Pixel Shader 3.0                                     |
|                | - Max. shared memory 256MB (see CAUTION 8)                        |
|                | - Supports D-Sub with max. resolution up to 1920x1440             |
|                | @ 60Hz  |
| Audio          | - 5.1 CH HD Audio (VIA® VT1705 Audio Codec)                       |
| LAN            | -N68-VGS3 FX  |
|                | Realtek Giga PHY RTL8211CL, speed 10/100/1000 Mb/s                |
|                | -N68-VS3 FX   |
|                | Realtek PHY RTL8201EL, speed 10/100 Mb/s                          |
|                | - Supports Wake-On-LAN  |
|                | - Supports PXE  |
| Rear Panel I/O | I/O Panel   |
|                | - 1 x PS/2 Mouse Port   |
|                | - 1 x PS/2 Keyboard Port  |
|                | - 1 x VGA Port  |
|                | - 4 x Ready-to-Use USB 2.0 Ports                                  |
|                | - 1 x RJ-45 LAN Port with LED (ACT/LINK LED and SPEED LED)        |
|                | - HD Audio Jack: Line in / Front Speaker / Microphone             |

| Connector      | - 4 x SATA2 3.0Gb/s connectors, support RAID (RAID 0, RAID 1,       |
|----------------|---|
| Someotor       | RAID 0+1, RAID 5, JBOD), NCQ and "Hot Plug" functions               |
|                | (see CAUTION 9)   |
|                | - 1 x ATA133 IDE connector (supports 2 x IDE devices)               |
|                | - 1 x Print port header   |
|                | - 1 x COM port header   |
|                | - CPU/Chassis FAN connector   |
|                | - 24 pin ATX power connector  |
|                | - 4 pin 12V power connector   |
|                | - Front panel audio header  |
|                | - 2 x USB 2.0 headers (support 4 USB 2.0 ports)                     |
| BIOS Feature   | - 8Mb AMI BIOS  |
|                | - AMI Legal BIOS  |
|                | - Supports "Plug and Play"  |
|                | - ACPI 1.1 Compliance Wake Up Events                                |
|                | - Supports jumperfree   |
|                | - SMBIOS 2.3.1 Support  |
|                | - CPU, VCCM Voltage Multi-adjustment                                |
| Support CD     | - Drivers, Utilities, AntiVirus Software (Trial Version), CyberLink |
|                | MediaEspresso 6.5 Trial, ASRock Software Suite (CyberLink           |
|                | DVD Suite - OEM and Trial; Creative Sound Blaster X-Fi MB -         |
|                | Trial; ASRock MAGIX Multimedia Suite - OEM)                         |
| Unique Feature | - ASRock OC Tuner (see CAUTION 10)                                  |
|                | - ASRock Intelligent Energy Saver (see CAUTION 11)                  |
|                | - ASRock Instant Boot   |
|                | - ASRock Instant Flash (see CAUTION 12)                             |
|                | - ASRock OC DNA (see CAUTION 13)                                    |
|                | - ASRock APP Charger (see CAUTION 14)                               |
|                | - ASRock SmartView (see CAUTION 15)                                 |
|                | - ASRock XFast USB (see CAUTION 16)                                 |
|                | - ASRock XFast LAN (see <b>CAUTION 17</b> )                         |
|                | - Hybrid Booster:   |
|                | - CPU Frequency Stepless Control (see CAUTION 18)                   |
|                | - ASRock U-COP (see <b>CAUTION 19</b> )                             |
|                | - Boot Failure Guard (B.F.G.)                                       |
| Hardware       | - CPU Temperature Sensing   |
| Monitor        | - Chassis Temperature Sensing                                       |
|                | - CPU Fan Tachometer  |
|                | - Chassis Fan Tachometer  |
|                | - CPU Quiet Fan   |
|                | - Voltage Monitoring: +12V, +5V, +3.3V, Vcore                       |

| os             | - Microsoft® Windows® 7 / 7 64-bit / Vista™ / Vista™ 64-bit |

#### WARNING

Please realize that there is a certain risk involved with overclocking, including adjusting the setting in the BIOS, applying Untied Overclocking Technology, or using the third-party overclocking tools. Overclocking may affect your system stability, or even cause damage to the components and devices of your system. It should be done at your own risk and expense. We are not responsible for possible damage caused by overclocking.

# **CAUTION!**

- If you adopt AM3+ CPU and install Windows® XP OS, you need to use the external graphics card.
- This motherboard supports CPU up to 95W. Please refer to our website for CPU support list. ASRock website <a href="http://www.asrock.com">http://www.asrock.com</a>
- 3. ASRock UCC (Unlock CPU Core) feature simplifies AMD CPU activation. As long as a simple switch of the BIOS option "ASRock UCC", you can unlock the extra CPU core to enjoy an instant performance boost. When UCC feature is enabled, the dual-core or triple-core CPU will boost to the quad-core CPU, and some CPU, including quad-core CPU, can also increase L3 cache size up to 6MB, which means you can enjoy the upgrade CPU performance with a better price. Please be noted that UCC feature is supported with AM3/AM3+ CPU only, and in addition, not every AM3/AM3+ CPU can support this function because some CPU's hidden core may be malfunctioned.
- 4. This motherboard supports Untied Overclocking Technology. Please read "Untied Overclocking Technology" on page 29 for details.
- This motherboard supports Dual Channel Memory Technology. Before you implement Dual Channel Memory Technology, make sure to read the installation guide of memory modules on page 16 for proper installation.
- Whether 1600MHz memory speed is supported depends on the AM3/ AM3+ CPU you adopt. If you want to adopt DDR3 1600 memory module on this motherboard, please refer to the memory support list on our website for the compatible memory modules.
  - ASRock website <a href="http://www.asrock.com">http://www.asrock.com</a>
- Due to the operating system limitation, the actual memory size may be less than 4GB for the reservation for system usage under Windows® 7 / Vista™ / XP. For Windows® OS with 64-bit CPU, there is no such limitation.
- The maximum shared memory size is defined by the chipset vendor and is subject to change. Please check NVIDIA® website for the latest information.

- Before installing SATAII hard disk to SATAII connector, please read the "SATAII
  Hard Disk Setup Guide" on page 24 to adjust your SATAII hard disk drive to
  SATAII mode. You can also connect SATA hard disk to SATAII connector
  directly.
- 10. It is a user-friendly ASRock overclocking tool which allows you to surveil your system by hardware monitor function and overclock your hardware devices to get the best system performance under Windows® environment. Please visit our website for the operation procedures of ASRock OC Tuner. ASRock website: <a href="http://www.asrock.com">http://www.asrock.com</a>
- 11. Featuring an advanced proprietary hardware and software design, Intelligent Energy Saver is a revolutionary technology that delivers unparalleled power savings. The voltage regulator can reduce the number of output phases to improve efficiency when the CPU cores are idle. In other words, it is able to provide exceptional power saving and improve power efficiency without sacrificing computing performance. To use Intelligent Energy Saver function, please enable Cool 'n' Quiet option in the BIOS setup in advance. Please visit our website for the operation procedures of Intelligent Energy Saver.
  ASRock website: <a href="http://www.asrock.com">http://www.asrock.com</a>
- 12. ASRock Instant Flash is a BIOS flash utility embedded in Flash ROM. This convenient BIOS update tool allows you to update system BIOS without entering operating systems first like MS-DOS or Windows®. With this utility, you can press <F6> key during the POST or press <F2> key to BIOS setup menu to access ASRock Instant Flash. Just launch this tool and save the new BIOS file to your USB flash drive, floppy disk or hard drive, then you can update your BIOS only in a few clicks without preparing an additional floppy diskette or other complicated flash utility. Please be noted that the USB flash drive or hard drive must use FAT32/ 16/12 file system.
- 13. The software name itself OC DNA literally tells you what it is capable of. OC DNA, an exclusive utility developed by ASRock, provides a convenient way for the user to record the OC settings and share with others. It helps you to save your overclocking record under the operating system and simplifies the complicated recording process of overclocking settings. With OC DNA, you can save your OC settings as a profile and share with your friends! Your friends then can load the OC profile to their own system to get the same OC settings as yours! Please be noticed that the OC profile can only be shared and worked on the same motherboard.

- 14. If you desire a faster, less restricted way of charging your Apple devices, such as iPhone/iPod/iPad Touch, ASRock has prepared a wonderful solution for you ASRock APP Charger. Simply installing the APP Charger driver, it makes your iPhone charged much quickly from your computer and up to 40% faster than before. ASRock APP Charger allows you to quickly charge many Apple devices simultaneously and even supports continuous charging when your PC enters into Standby mode (S1), Suspend to RAM (S3), hibernation mode (S4) or power off (S5). With APP Charger driver installed, you can easily enjoy the marvelous charging experience than ever.
  - ASRock website: http://www.asrock.com/Feature/AppCharger/index.asp
- 15. SmartView, a new function of internet browser, is the smart start page for IE that combines your most visited web sites, your history, your Facebook friends and your real-time newsfeed into an enhanced view for a more personal Internet experience. ASRock motherboards are exclusively equipped with the SmartView utility that helps you keep in touch with friends on-the-go. To use SmartView feature, please make sure your OS version is Windows® 7 / 7 64 bit / Vista™ / Vista™ 64 bit, and your browser version is IE8.
  - ASRock website: http://www.asrock.com/Feature/SmartView/index.asp
- 16. ASRock XFast USB can boost USB storage device performance. The performance may depend on the property of the device.
- 17. ASRock XFast LAN provides a faster internet access, which includes below benefits. LAN Application Prioritization: You can configure your application priority ideally and/or add new programs. Lower Latency in Game: After setting online game priority higher, it can lower the latency in game. Traffic Shaping: You can watch Youtube HD video and download files simultaneously. Real-Time Analysis of Your Data: With the status window, you can easily recognize which data streams you are currently transferring.
- 18. Although this motherboard offers stepless control, it is not recommended to perform over-clocking. Frequencies other than the recommended CPU bus frequencies may cause the instability of the system or damage the CPU.
- 19. While CPU overheat is detected, the system will automatically shutdown. Before you resume the system, please check if the CPU fan on the motherboard functions properly and unplug the power cord, then plug it back again. To improve heat dissipation, remember to spray thermal grease between the CPU and the heatsink when you install the PC system.

# 1.3 Motherboard Layout (N68-VGS3 FX / N68-VS3 FX)

- PS2\_USB\_PWR1 Jumper
- 2 CPU Fan Connector (CPU\_FAN1)
- USB\_PWR2 Jumper
- 2 x 240-pin DDR3 DIMM Slots . (Dual Channel: DDR3\_A1, DDR3\_B1; Blue)
- **CPU Heatsink Retention Module**
- Primary IDE Connector (IDE1, Blue)
- USB 2.0 Header (USB6\_7, Blue)
- USB 2.0 Header (USB4\_5, Blue)
- SATAII Connector (SATAII\_2 (PORT 0.1))
- 10 SATAII Connector (SATAII\_4 (PORT 1.1))
- 11 SATAII Connector (SATAII\_3 (PORT 1.0)) 12 SATAII Connector (SATAII\_1 (PORT 0.0))
- 13 NVIDIA GeForce 7025 / nForce 630a
- SPI Flash Memory (4Mb)

- Clear CMOS Jumper (CLRCMOS1) 15
- 16 System Panel Header (PANEL1, White)
- 17 Chassis Speaker Header (SPEAKER 1, White)
- Print Port Header (LPT1, White) 18
- 19 Chassis Fan Connector (CHA\_FAN1)
- 20 Serial Port Connector (COM1)
- 21 PCI Slot (PCI1)
- PCI Express x16 Slot (PCIE1) 22
- Front Panel Audio Header 23 (HD\_AUDIO1, Lime)
- 24 ATX 12V Power Connector (ATX12V1)
- 25 AM3 CPU Socket
- ATX Power Connector (ATXPWR1)

# 1.4 I/O Panel (N68-VG\$3 FX)

- PS/2 Mouse Port (Green)
- RJ-45 Port
- Line In (Light Blue) 3
- 4 Front Speaker (Lime)
- Microphone (Pink)

- USB 2.0 Ports (USB01)
- USB 2.0 Ports (USB23)
- VGA Port 8
- PS/2 Keyboard Port (Purple)
- \* There are two LED next to the LAN port. Please refer to the table below for the LAN port LED indications.

#### **LAN Port LED Indications**

#### SPEEDIED Activity/Link LED

| Status   | Description   |  |
|----------|---------------|--|
| Off      | No Activity   |  |
| Blinking | Data Activity |  |

| OI LLD LLD |                    |  |
|------------|--------------------|--|
| Status     | Description        |  |
| Off        | 10Mbps connection  |  |
| Orange     | 100Mbps connection |  |
| Green      | 1Gbps connection   |  |
|            |                    |  |

**LAN Port** 

To enable Multi-Streaming function, you need to connect a front panel audio cable to the front panel audio header. After restarting your computer, you will find "VIA HD Audio Deck" tool on your system. Please follow below instructions according to the OS you install.

#### For Windows® XP / XP 64-bit OS:

Please click "VIA HD Audio Deck" icon , and click "Speaker". Then you are allowed to

select "2 Channel" or "4 Channel". Click "Power" to save your change.

# For Windows® 7 / 7 64-bit / Vista™ / Vista™ 64-bit OS:

Please click "VIA HD Audio Deck" icon

, and click "Advanced Options" on the left side

on the bottom. In "Advanced Options" screen, select "Independent Headphone", and click "OK" to save your change.

# 1.5 I/O Panel (N68-VS3 FX)

- PS/2 Mouse Port (Green)
- RJ-45 Port
- Line In (Light Blue)
- 4 Front Speaker (Lime)
- Microphone (Pink)

- USB 2.0 Ports (USB01)
- USB 2.0 Ports (USB23)
- VGA Port
- PS/2 Keyboard Port (Purple)
- \* There are two LED next to the LAN port. Please refer to the table below for the LAN port LED indications. ACT/LINK SPEED

# **LAN Port LED Indications**

# Activity/Link LED

| Status   | Description   |
|----------|---------------|
| Off      | No Activity   |
| Blinking | Data Activity |

#### **SPEED LED** Status Description Off 10Mbps connection Orange 100Mbps connection

**LAN Port** 

To enable Multi-Streaming function, you need to connect a front panel audio cable to the front panel audio header. After restarting your computer, you will find "VIA HD Audio Deck" tool on your system. Please follow below instructions according to the OS you install.

#### For Windows® XP / XP 64-bit OS:

Please click "VIA HD Audio Deck" icon , and click "Speaker". Then you are allowed to

select "2 Channel" or "4 Channel". Click "Power" to save your change.

# For Windows® 7 / 7 64-bit / Vista™ / Vista™ 64-bit OS:

Please click "VIA HD Audio Deck" icon

, and click "Advanced Options" on the left side

on the bottom. In "Advanced Options" screen, select "Independent Headphone", and click "OK" to save your change.

# 2. Installation

This is a Micro ATX form factor (8.5-in x 7.0-in, 21.6~cm x 17.8~cm) motherboard. Before you install the motherboard, study the configuration of your chassis to ensure that the motherboard fits into it.

# **Pre-installation Precautions**

Take note of the following precautions before you install motherboard components or change any motherboard settings.

Before you install or remove any component, ensure that the power is switched off or the power cord is detached from the power supply. Failure to do so may cause severe damage to the motherboard, peripherals, and/or components.

- Unplug the power cord from the wall socket before touching any component
- To avoid damaging the motherboard components due to static electricity, NEVER place your motherboard directly on the carpet or the like. Also remember to use a grounded wrist strap or touch a safety grounded object before you handle components.
- 3. Hold components by the edges and do not touch the ICs.
- 4. Whenever you uninstall any component, place it on a grounded antistatic pad or in the bag that comes with the component.
- When placing screws into the screw holes to secure the motherboard to the chassis, please do not over-tighten the screws! Doing so may damage the motherboard.

#### **CPU** Installation 2.1

- Step 1. Unlock the socket by lifting the lever up to a 90° angle.
- Step 2. Position the CPU directly above the socket such that the CPU corner with the golden triangle matches the socket corner with a small triangle.
- Step 3. Carefully insert the CPU into the socket until it fits in place.

The CPU fits only in one correct orientation. DO NOT force the CPU into the socket to avoid bending of the pins.

Step 4. When the CPU is in place, press it firmly on the socket while you push down the socket lever to secure the CPU. The lever clicks on the side tab to indicate that it is locked.

Lift Up The Socket Lever

STEP 2 / STEP 3: Match The CPU Golden Triangle Push Down And Lock To The Socket Corner Small Triangle

STEP 4: The Socket Level

# 2.2 Installation of CPU Fan and Heatsink

After you install the CPU into this motherboard, it is necessary to install a larger heatsink and cooling fan to dissipate heat. You also need to spray thermal grease between the CPU and the heatsink to improve heat dissipation. Make sure that the CPU and the heatsink are securely fastened and in good contact with each other. Then connect the CPU fan to the CPU FAN connector (CPU\_FAN1, see Page 11, No. 2). For proper installation, please kindly refer to the instruction manuals of the CPU fan and the heatsink.

# 2.3 Installation of Memory Modules (DIMM)

**N68-VGS3 FX / N68-VS3 FX** motherboard provides two 240-pin DDR3 (Double Data Rate 3) DIMM slots, and supports Dual Channel Memory Technology. For dual channel configuration, you always need to install two **identical** (the same brand, speed, size and chip-type) memory modules in the DDR3 DIMM slots to activate Dual Channel Memory Technology. Otherwise, it will operate at single channel mode.

- It is not allowed to install a DDR or DDR2 memory module into DDR3 slot; otherwise, this motherboard and DIMM may be damaged.
- If you install only one memory module or two non-identical memory modules, it is unable to activate the Dual Channel Memory Technology.

# Installing a DIMM

Please make sure to disconnect power supply before adding or removing DIMMs or the system components.

- Step 1. Unlock a DIMM slot by pressing the retaining clips outward.
- Step 2. Align a DIMM on the slot such that the notch on the DIMM matches the break on the slot.

The DIMM only fits in one correct orientation. It will cause permanent damage to the motherboard and the DIMM if you force the DIMM into the slot at incorrect orientation.

Step 3. Firmly insert the DIMM into the slot until the retaining clips at both ends fully snap back in place and the DIMM is properly seated.

# 2.4 Expansion Slots (PCI and PCI Express Slots)

There are 1 PCI slot and 1 PCI Express slot on this motherboard.

PCI slot: PCI slot is used to install expansion cards that have the 32-bit PCI

interface.

PCIE slot: PCIE1 (PCIE x16 slot) is used for PCI Express cards with x16 lane

width graphics cards.

# Installing an expansion card

- Step 1. Before installing the expansion card, please make sure that the power supply is switched off or the power cord is unplugged. Please read the documentation of the expansion card and make necessary hardware settings for the card before you start the installation.
- Step 2. Remove the bracket facing the slot that you intend to use. Keep the screws for later use.
- Step 3. Align the card connector with the slot and press firmly until the card is completely seated on the slot.
- Step 4. Fasten the card to the chassis with screws.

# 2.5 Easy Multi Monitor Feature

This motherboard supports Multi Monitor upgrade. With the internal onboard VGA and the external add-on PCI Express VGA card, you can easily enjoy the benefits of Multi Monitor feature. Please refer to the following steps to set up a multi monitor environment:

- 1. Install the NVIDIA® PCI Express VGA card to PCIE1 (PCIE x16 slot). Please refer to page 17 for proper expansion card installation procedures for details.
- Connect the D-Sub monitor cable to the VGA/D-Sub port on the I/O panel of this
  motherboard. Connect another D-Sub monitor cable to the VGA/D-Sub connector of
  the add-on PCI Express VGA card. Connect the DVI-D monitor cable to the
  VGA/DVI-D connector of the add-on PCI Express VGA card.
- 3. Boot your system. Press <F2> or <Del> to enter BIOS setup. Enter "Share Memory" option to adjust the memory capability to [16MB], [32MB], [64MB], [128MB] or [256MB] to enable the function of onboard VGA/D-sub. Please make sure that the value you select is less than the total capability of the system memory. If you do not adjust the BIOS setup, the default value of "Share Memory", [Auto], will disable onboard VGA/D-Sub function when the add-on VGA card is inserted to this motherboard.
- 4. Install the onboard VGA driver to your system. If you have installed the onboard VGA driver already, there is no need to install it again.
- 5. Set up a multi-monitor display.

# For Windows® XP / XP 64-bit OS:

Right click the desktop, choose "Properties", and select the "Settings" tab so that you can adjust the parameters of the multi-monitor according to the steps below.

- A. Click the "Identify" button to display a large number on each monitor.
- B. Right-click the display icon in the Display Properties dialog that you wish to be your primary monitor, and then select "Primary". When you use multiple monitors with your card, one monitor will always be Primary, and all additional monitors will be designated as Secondary.
- C. Select the display icon identified by the number 2.
- D. Click "Extend my Windows desktop onto this monitor".
- E. Right-click the display icon and select "Attached", if necessary.
- F. Set the "Screen Resolution" and "Color Quality" as appropriate for the second monitor. Click "Apply" or "OK" to apply these new values.
- G. Repeat steps C through E for the diaplay icon identified by the number one, two and three.

#### For Windows® 7 / 7 64-bit / Vista™ / Vista™ 64-bit OS:

Right click the desktop, choose "Personalize", and select the "Display Settings" tab so that you can adjust the parameters of the multi-monitor according to the steps below.

A. Click the number "2" icon.

- B. Click the items "This is my main monitor" and "Extend the desktop onto this monitor".
- C. Click "OK" to save your change.
- D. Repeat steps A through C for the display icon identified by the number one, two and three.
- 6. Use Multi Monitor feature. Click and drag the display icons to positions representing the physical setup of your monitors that you would like to use. The placement of display icons determines how you move items from one monitor to another.

# 2.6 Jumpers Setup

The illustration shows how jumpers are setup. When the jumper cap is placed on pins, the jumper is "Short". If no jumper cap is placed on pins, the jumper is "Open". The illustration shows a 3-pin jumper whose pin1 and pin2 are "Short" when jumper cap is placed on these 2 pins.

(standby) for PS/2 or

USB01/23 wake up events.

| Jumper            | Sett | ing                        |                             |
|-------------------|------|----------------------------|-----------------------------|
| PS2_USB_PWR1      | 1_2  | 2_3                        | Short pin2, pin3 to enable  |
| (see p.11, No. 1) |      | $\bigcirc \bullet \bullet$ | +5VSB (standby) for PS/2 of |
|                   | +5V  | +5VSB                      | LIOD04/00                   |

Note: To select +5VSB, it requires 2 Amp and higher standby current provided by power supply.

Note: To select +5VSB, it requires 2 Amp and higher standby current provided by power supply.

Note: CLRCMOS1 allows you to clear the data in CMOS. The data in CMOS includes system setup information such as system password, date, time, and system setup parameters. To clear and reset the system parameters to default setup, please turn off the computer and unplug the power cord from the power supply. After waiting for 15 seconds, use a jumper cap to short pin2 and pin3 on CLRCMOS1 for 5 seconds. However, please do not clear the CMOS right

after you update the BIOS. If you need to clear the CMOS when you just finish updating the BIOS, you must boot up the system first, and then shut it down before you do the clear-CMOS action.

# 2.7 Onboard Headers and Connectors

Onboard headers and connectors are NOT jumpers. Do NOT place jumper caps over these headers and connectors. Placing jumper caps over the headers and connectors will cause permanent damage of the motherboard!

80-conductor ATA 66/100/133 cable

Note: Please refer to the instruction of your IDE device vendor for the details.

# 

These four Serial ATAII (SATAII) connectors support SATAII or SATA hard disk for internal storage devices. The current SATAII interface allows up to 3.0 Gb/s data transfer rate.

Serial ATA (SATA) Data Cable (Optional)

Either end of the SATA data cable can be connected to the SATA / SATAII hard disk or the SATAII connector on the motherboard.

#### USB 2.0 Headers

(9-pin USB6\_7)

(see p.11 No. 7)

(9-pin USB4\_5) (see p.11 No. 8)

Besides four default USB 2.0 ports on the I/O panel, there are two USB 2.0 headers on this motherboard. Each USB 2.0 header can support two USB 2.0 ports.

#### Print Port Header

(25-pin LPT1)

(see p.11 No. 18)

This is an interface for print port cable that allows convenient connection of printer devices.

## Front Panel Audio Header

(9-pin HD\_AUDIO1)

(see p.11, No. 23)

This is an interface for the front panel audio cable that allows convenient connection and control of audio devices.

- 1. High Definition Audio supports Jack Sensing, but the panel wire on the chassis must support HDA to function correctly. Please follow the instruction in our manual and chassis manual to install your system.
- 2. If you use AC'97 audio panel, please install it to the front panel audio header as below:
  - A. Connect Mic\_IN (MIC) to MIC2\_L.
  - B. Connect Audio\_R (RIN) to OUT2\_R and Audio\_L (LIN) to OUT2\_L.
  - C. Connect Ground (GND) to Ground (GND).
  - D. MIC\_RET and OUT\_RET are for HD audio panel only. You don't need to connect them for AC'97 audio panel.

This header accommodates several system front panel functions.

# Chassis Speaker Header (4-pin SPEAKER 1) (see p.11 No. 17)

Please connect the chassis speaker to this header.

# Chassis Fan Connector (3-pin CHA\_FAN1) (see p.11 No. 19)

Please connect a chassis fan cable to this connector and match the black wire to the ground pin.

# CPU Fan Connector (4-pin CPU\_FAN1) (see p.11 No. 2)

Please connect the CPU fan cable to this connector and match the black wire to the ground pin.

Though this motherboard provides 4-Pin CPU fan (Quiet Fan) support, the 3-Pin CPU fan still can work successfully even without the fan speed control function. If you plan to connect the 3-Pin CPU fan to the CPU fan connector on this motherboard, please connect it to Pin 1-3.

Pin 1-3 Connected ■
3-Pin Fan Installation

ATX Power Connector (24-pin ATXPWR1) (see p.11 No. 26)

Please connect an ATX power supply to this connector.

Though this motherboard provides 24-pin ATX power connector, it can still work if you adopt a traditional 20-pin ATX power supply. To use the 20-pin ATX power supply, please plug your power supply along with Pin 1 and Pin 13.

20-Pin ATX Power Supply Installation

# ATX 12V Power Connector

(4-pin ATX12V1) (see p.11 No. 24)

Please note that it is necessary to connect a power supply with ATX 12V plug to this connector. Failing to do so will cause power up failure.

# Serial port Header

(9-pin COM1) (see p.11 No.20)

This COM1 header supports a serial port module.

# 2.8 SATAII Hard Disk Setup Guide

Before installing SATAII hard disk to your computer, please carefully read below SATAII hard disk setup guide. Some default setting of SATAII hard disks may not be at SATAII mode, which operate with the best performance. In order to enable SATAII function, please follow the below instruction with different vendors to correctly adjust your SATAII hard disk to SATAII mode in advance; otherwise, your SATAII hard disk may fail to run at SATAII mode.

# Western Digital

If pin 5 and pin 6 are shorted, SATA 1.5Gb/s will be enabled.

On the other hand, if you want to enable SATAII 3.0Gb/s, please remove the jumpers from pin 5 and pin 6.

#### SAMSUNG

If pin 3 and pin 4 are shorted, SATA 1.5Gb/s will be enabled.

On the other hand, if you want to enable SATAII 3.0Gb/s, please remove the jumpers from pin 3 and pin 4.

# HITACHI

Please use the Feature Tool, a DOS-bootable tool, for changing various ATA features. Please visit HITACHI's website for details:

http://www.hitachigst.com/hdd/support/download.htm

The above examples are just for your reference. For different SATAII hard disk products of different vendors, the jumper pin setting methods may not be the same. Please visit the vendors' website for the updates.

# 2.9 Serial ATA (SATA) / Serial ATAII (SATAII) Hard Disks Installation

This motherboard adopts NVIDIA® GeForce 7025 / nForce 630a chipset that supports Serial ATA (SATA) / Serial ATAII (SATAII) hard disks and RAID functions. You may install SATA / SATAII hard disks on this motherboard for internal storage devices. This section will guide you to install the SATA / SATAII hard disks.

- STEP 1: Install the SATA / SATAII hard disks into the drive bays of your chassis.
- STEP 2: Connect the SATA power cable to the SATA / SATAII hard disk.
- STEP 3: Connect one end of the SATA data cable to the motherboard's SATAII connector
- STEP 4: Connect the other end of the SATA data cable to the SATA / SATAII hard disk.

# 2.10 Hot Plug and Hot Swap Functions for SATA / SATAII HDDs

This motherboard supports Hot Plug and Hot Swap functions for SATA / SATAII

#### NOTE

# What is Hot Plug Function?

If the SATA / SATAII HDDs are NOT set for RAID configuration, it is called "Hot Plug" for the action to insert and remove the SATA / SATAII HDDs while the system is still power-on and in working condition. However, please note that it cannot perform Hot Plug if the OS has been installed into the SATA / SATAII HDD.

#### What is Hot Swap Function?

If SATA / SATAII HDDs are built as RAID1 or RAID 5 then it is called "Hot Swap" for the action to insert and remove the SATA / SATAII HDDs while the system is still power-on and in working condition.

# 2.11 SATA / SATAII HDD Hot Plug Feature and Operation Guide

This motherboard supports Hot Plug feature for SATA / SATAII HDD in RAID mode. Please read below operation guide of SATA / SATAII HDD Hot Plug feature carefully. Before you process the SATA / SATAII HDD Hot Plug, please check below cable accessories from the motherboard gift box pack.

A. 7-pin SATA data cable

B. SATA power cable with SATA 15-pin power connector interface

The SATA 15-pin power connector (Black) connect to SATA / SATAII HDD

1x4-pin conventional power connector (White) connect to power supply

# Caution

- Without SATA 15-pin power connector interface, the SATA / SATAII Hot Plug cannot be processed.
- Even some SATA / SATAII HDDs provide both SATA 15-pin power connector and IDE 1x4-pin conventional power connector interfaces, the IDE 1x4-pin conventional power connector interface is definitely not able to support Hot Plug and will cause the HDD damage and data loss.

# Points of attention, before you process the Hot Plug:

- 1. Below operation procedure is designed only for our motherboard, which supports SATA / SATAII HDD Hot Plug.
  - \* The SATA / SATAII Hot Plug feature might not be supported by the chipset because of its limitation, the SATA / SATAII Hot Plug support information of our motherboard is indicated in the product spec on our website:

# www.asrock.com

- 2. Make sure your SATA / SATAII HDD can support Hot Plug function from your dealer or HDD user manual. The SATA / SATAII HDD, which cannot support Hot Plug function, will be damaged under the Hot Plug operation.
- Please make sure the SATA / SATAII driver is installed into system properly. The latest SATA / SATAII driver is available on our support website: www.asrock.com
- 4. Make sure to use the SATA power cable & data cable, which are from our motherboard package.
- Please follow below instructions step by step to reduce the risk of HDD crash or data loss.

# How to Hot Plug a SATA / SATAII HDD:

Points of attention, before you process the Hot Plug:

Please do follow below instruction sequence to process the Hot Plug, improper procedure will cause the SATA / SATAII HDD damage and data loss.

Step 1 Please connect SATA power cable 1x4-pin end Step 2 Connect SATA data cable to (White) to the power supply 1x4-pin cable.

the motherboard's SATAII connector.

Step 3 Connect SATA 15-pin power cable connector (Black) end to SATA / SATAII HDD.

SATA power cable 1x4-pin power connector (White)

Connect SATA data cable to the SATA / SATAII HDD.

# How to Hot Unplug a SATA / SATAII HDD:

Points of attention, before you process the Hot Unplug:

Please do follow below instruction sequence to process the Hot Unplug, improper procedure will cause the SATA / SATAII HDD damage and data loss.

Step 1 Unplug SATA data cable from SATA / SATAII HDD side.

Step 2 Unplug SATA 15-pin power cable connector (Black) from SATA / SATAII HDD side.

#### 2.12 Driver Installation Guide

To install the drivers to your system, please insert the support CD to your optical drive first. Then, the drivers compatible to your system can be auto-detected and listed on the support CD driver page. Please follow the order from up to bottom side to install those required drivers. Therefore, the drivers you install can work properly.

# 2.13 Installing Windows® 7 / 7 64-bit / Vista™ / Vista™ 64-bit / XP / XP 64-bit Without RAID Functions

If you just want to install Windows® 7 / 7 64-bit / Vista™ / Vista™ 64-bit / XP / XP 64-bit on your SATA / SATAII HDDs without RAID functions, you don't have to make a SATA / SATAII driver diskette. Besides, there is no need for you to change the BIOS setting. You can start to install Windows® 7 / 7 64-bit / Vista™ / Vista™ 64-bit / XP / XP 64-bit on your system directly.

# 2.14 Installing Windows® 7 / 7 64-bit / Vista™ / Vista™ 64-bit With RAID Functions

If you want to install Windows® 7 / 7 64-bit / Vista™ / Vista™ 64-bit OS on your SATA / SATAII HDDs with RAID functions, please follow below procedures according to the OS you install.

#### STEP 1: Set Up BIOS.

A. Enter BIOS SETUP UTILITY  $\rightarrow$  Advanced screen  $\rightarrow$  Storage Configuration. B. Set the "SATA Operation Mode" option to [RAID].

# STEP 2: Use "RAID Installation Guide" to set RAID configuration.

Before you start to configure RAID function, you need to check the RAID installation guide in the Support CD for proper configuration. Please refer to the BIOS RAID installation guide part of the document in the following path in the Support CD:

# .. \ RAID Installation Guide

# STEP 3: Install Windows® 7 / 7 64-bit / Vista™ / Vista™ 64-bit OS on your system.

NOTE. If you install Windows® 7 / 7 64-bit / Vista™ / Vista™ 64-bit on IDE HDDs and want to manage (create, convert, delete, or rebuild) RAID functions on SATA / SATAII HDDs, you still need to set up "SATA Operation Mode" to [RAID] in BIOS first. Then, please set the RAID configuration by using the Windows RAID installation guide in the following path in the Support CD:

#### .. \ RAID Installation Guide

NOTE. For Windows® 7 / 7 64-bit users, you do not need to load RAID driver from ASRock support CD. Please use the native driver to install Windows® 7 / 7 64-bit OS, and then install ASRock All-in-1 driver.

# 2.15 Untied Overclocking Technology

This motherboard supports Untied Overclocking Technology, which means during overclocking, FSB enjoys better margin due to fixed PCI / PCIE buses. Before you enable Untied Overclocking function, please enter "Overclock Mode" option of BIOS setup to set the selection from [Auto] to [CPU, PCIE, Async.]. Therefore, CPU FSB is untied during overclocking, but PCI / PCIE buses are in the fixed mode so that FSB can operate under a more stable overclocking environment.

Please refer to the warning on page 8 for the possible overclocking risk before you apply Untied Overclocking Technology.

# 3. BIOS SETUP UTILITY

# 3.1 Introduction

This section explains how to use the BIOS SETUP UTILITY to configure your system. The SPI Memory on the motherboard stores the BIOS SETUP UTILITY. You may run the BIOS SETUP UTILITY when you start up the computer. Please press <F2> or <Del> during the Power-On-Self-Test (POST) to enter the BIOS SETUP UTILITY, otherwise, POST will continue with its test routines.

If you wish to enter the BIOS SETUP UTILITY after POST, restart the system by pressing <Ctl> + <Alt> + <Delete>, or by pressing the reset button on the system chassis. You may also restart by turning the system off and then back on.

Because the BIOS software is constantly being updated, the following BIOS setup screens and descriptions are for reference purpose only, and they may not exactly match what you see on your screen.

# 3.1.1 BIOS Menu Bar

The top of the screen has a menu bar with the following selections:

Main To set up the system time/date information

OC Tweaker To set up overclocking features

Advanced To set up the advanced BIOS features

H/W Monitor To display current hardware status

**Boot** To set up the default system device to locate and load the

Operating System

**Security** To set up the security features

and then press <Enter> to get into the sub screen.

# 3.1.2Navigation Keys

Please check the following table for the function description of each navigation key

| Navigation Key(s) | Function Description                                  |
|-------------------|---|
| <del>←</del> /→   | Moves cursor left or right to select Screens          |
| ↑ <b>/</b> ↓      | Moves cursor up or down to select items               |
| + / -             | To change option for the selected items               |
| <enter></enter>   | To bring up the selected screen                       |
| <f1></f1>         | To display the General Help Screen                    |
| <f9></f9>         | To load optimal default values for all the settings   |
| <f10></f10>       | To save changes and exit the BIOS SETUP UTILITY       |
| <esc></esc>       | To jump to the Exit Screen or exit the current screen |

# 3.2 Main Screen

When you enter the BIOS SETUP UTILITY, the Main screen will appear and display the system overview.

# N68-VGS3 FX

System Time [Hour:Minute:Second]

Use this item to specify the system time.

System Date [Day Month/Date/Year]

Use this item to specify the system date.

#### **N68-VS3 FX**

#### System Time [Hour:Minute:Second]

Use this item to specify the system time.

# System Date [Day Month/Date/Year]

Use this item to specify the system date.

# 3.3 OC Tweaker Screen

In the OC Tweaker screen, you can set up overclocking features.

# **CPU Configuration**

# **Overclock Mode**

Use this to select Overclock Mode. The default value is [Auto]. Configuration options: [Auto], [CPU, PCIE, Sync.], [CPU, PCIE, Async.] and [Optimized].

# **CPU Frequency (MHz)**

Use this option to adjust CPU frequency.

#### PCIE Frequency (MHz)

Use this option to adjust PCIE frequency.

#### **Boot Failure Guard**

Enable or disable the feature of Boot Failure Guard.

#### **Boot Failure Guard Count**

Enable or disable the feature of Boot Failure Guard Count.

#### **CPU/LDT Spread Spectrum**

This feature will be set to [Enabled] as default. Configuration options: [Disabled] and [Enabled].

# **PCIE Spread Spectrum**

This feature will be set to [Enabled] as default. Configuration options: [Disabled] and [Enabled].

#### SATA Spread Spectrum

This feature will be set to [Enabled] as default. Configuration options: [Disabled] and [Enabled].

#### **ASRock UCC**

ASRock UCC (Unlock CPU Core) feature simplifies AMD CPU activation. As long as a simple switch of the BIOS option "ASRock UCC", you can unlock the extra CPU core to enjoy an instant performance boost. When UCC feature is enabled, the dual-core or triple-core CPU will boost to the quad-core CPU, and some CPU, including quad-core CPU, can also increase L3 cache size up to 6MB, which means you can enjoy the upgrade CPU performance with a better price. Please be noted that UCC feature is supported with AM3/AM3+ CPU only, and in addition, not every AM3/AM3+ CPU can support this function because some CPU's hidden core may be malfunctioned.

# **AMD Turbo Core Technology**

This item appears only when the processor you adopt supports this feature. Use this to select enable or disable AMD Turbo Core Technology. Confi guration options: [Auto] and [Disabled]. The default value is [Auto].

#### **AMD IO C-State Support**

This allows you to enable or disable AMD IO C-State Support. The default value is [Enabled].

#### **CPU Active Core Control**

This allows you to adjust CPU Active Core Control feature. The configuration options depend on the CPU core you adopt. The default value is [Disabled].

#### **Processor Maximum Frequency**

It will display Processor Maximum Frequency for reference.

# North Bridge Maximum Frequency

It will display North Bridge Maximum Frequency for reference.

# **Processor Maximum Voltage**

It will display Processor Maximum Voltage for reference.

#### Multiplier/Voltage Change

This item is set to [Auto] by default. If it is set to [Manual], you may adjust the value of Processor Frequency and Processor Voltage. However, it is recommended to keep the default value for system stability.

# **CPU Frequency Multiplier**

For safety and system stability, it is not recommended to adjust the value of this item.

# **Processor Voltage**

It allows you to adjust the value of processor voltage. However, for safety and system stability, it is not recommended to adjust the value of this item.

# **NB Frequency Multiplier**

For safety and system stability, it is not recommended to adjust the value of this item.

# **HT Bus Speed**

This feature allows you selecting Hyper-Transport bus speed. Configuration options: [Auto], [x1 200 MHz] to [x5 1000 MHz].

# **HT Bus Width**

This feature allows you selecting Hyper-Transport bus width. Configuration options: [Auto], [8 Bit] and [16 Bit].

# **Memory Configuration**

# **Memory Clock**

This item can be set by the code using [Auto]. You can set one of the standard values as listed: [400MHz DDR3\_800], [533MHz DDR3\_1066], [667MHz DDR3\_1333] and [800MHz DDR3\_1600].

# **DRAM Voltage**

Use this to select DRAM voltage. The default value is [Auto].

#### **Memory Timing**

#### **Power Down Enable**

Use this item to enable or disable DDR power down mode.

#### **Bank Interleaving**

Interleaving allows memory accesses to be spread out over banks on the same node, or accross nodes, decreasing access contention.

#### **Channel Interleaving**

This allows you to enable Channel Memory Interleaving. The default value is [Hash 2].

# CAS Latency (CL)

Use this item to adjust the means of memory accessing. The default value is [Auto].

# **TRCD**

Use this to adjust TRCD values. The default value is [Auto].

# TRP

Use this to adjust TRP values. The default value is [Auto].

# TRAS

Use this to adjust TRAS values. The default value is [Auto].

# **Command Rate**

Use this item to change Command Rate Auto/Manual setting. Min: 1N. Max: 2N. The default is [Auto].

# TRC

Use this to adjust TRC values. The default value is [Auto].

#### **TRTP**

Use this to adjust TRTP values. The default value is [Auto].

# **TWR**

Use this to adjust TWR values. The default value is [Auto].

# TRFC

Use this to adjust TRFC values. The default value is [Auto].

# TRRD

Use this to adjust TRRD values. The default value is [Auto].

#### TWTR

Use this to adjust TWTR values. The default value is [Auto].

#### TRTP

Use this to adjust TRTP values. The default value is [Auto].

# **TFAW**

Use this to adjust TFAW values. The default value is [Auto].

# **Chipset Settings**

# **Chipset Voltage**

Use this to select chipset voltage. The default value is [Auto].

# Would you like to save current setting user defaults?

In this option, you are allowed to load and save three user defaults according to your own requirements.

#### 3.4 Advanced Screen

In this section, you may set the configurations for the following items: CPU Configuration, Chipset Configuration, ACPI Configuration, Storage Configuration, PCIPnP Configuration, SuperIO Configuration, and USB Configuration.

Setting wrong values in this section may cause the system to malfunction.

### **ASRock Instant Flash**

ASRock Instant Flash is a BIOS flash utility embedded in Flash ROM. This convenient BIOS update tool allows you to update system BIOS without entering operating systems first like MS-DOS or Windows®. Just launch this tool and save the new BIOS file to your USB flash drive, floppy disk or hard drive, then you can update your BIOS only in a few clicks without preparing an additional floppy diskette or other complicated flash utility. Please be noted that the USB flash drive or hard drive must use FAT32/16/12 file system. If you execute ASRock Instant Flash utility, the utility will show the BIOS files and their respective information. Select the proper BIOS file to update your BIOS, and reboot your system after BIOS update process completes.

# 3.4.1 CPU Configuration

#### Cool 'n' Quiet

Use this item to enable or disable AMD's Cool 'n' Quiet™ technology. The default value is [Auto]. Configuration options: [Auto], [Enabled] and [Disabled]. If you install Windows® 7 / Vista™ and want to enable this function, please set this item to [Enabled]. Please note that enabling this function may reduce CPU voltage and memory frequency, and lead to system stability or compatibility issue with some memory modules or power supplies. Please set this item to [Disable] if above issue occurs.

# Secure Virtual Machine

When this option is set to [Enabled], a VMM (Virtual Machine Architecture) can utilize the additional hardware capabilities provided by AMD-V. The default value is [Enabled]. Configuration options: [Enabled] and [Disabled].

### **Enhance Halt State (C1E)**

All processors support the Halt State (C1). The C1 state is supported through the native processor instructions HLT and MWAIT and requires no hardware support from the chipset. In the C1 power state, the processor maintains the context of the system caches.

# 3.4.2 Chipset Configuration

### **Onboard LAN**

This allows you to enable or disable the onboard LAN feature.

### **Onboard HD Audio**

Select [Auto], [Enabled] or [Disabled] for the onboard HD Audio feature. If you select [Auto], the onboard HD Audio will be disabled when PCI Sound Card is plugged.

### **Front Panel**

Select [Auto] or [Disabled] for the onboard HD Audio Front Panel.

# **Share Memory**

This allows you to set share memory feature. The default value is [Auto]. Configuration options: [Auto], [32MB], [64MB], [128MB] and [256MB].

# **Primary Graphics Adapter**

This item will switch the PCI Bus scanning order while searching for video card. It allows you to select the type of Primary VGA in case of multiple video controllers. The default value of this feature is [PCI]. Configuration options: [PCI], [Onboard] and [PCI Express].

# 3.4.3 ACPI Configuration

#### Suspend to RAM

Use this item to select whether to auto-detect or disable the Suspend-to-RAM feature. Select [Auto] will enable this feature if the OS supports it. If you set this item to [Disabled], the function "Repost Video on STR Resume" will be bidden.

### **Away Mode Support**

Use this item to enable or disable Away Mode support under Windows® XP Media Center OS. The default value is [Disabled].

#### **Restore on AC/Power Loss**

This allows you to set the power state after an unexpected AC/power loss. If [Power Off] is selected, the AC/power remains off when the power recovers. If [Power On] is selected, the AC/power resumes and the system starts to boot up when the power recovers.

### Ring-In Power On

Use this item to enable or disable Ring-In signals to turn on the system from the power-soft-off mode.

### **PCI Devices Power On**

Use this item to enable or disable PCI devices to turn on the system from the power-soft-off mode.

### PS/2 Keyboard Power On

Use this item to enable or disable PS/2 keyboard to turn on the system from the power-soft-off mode.

#### **RTC Alarm Power On**

#### **ACPI HPET Table**

Use this item to enable or disable ACPI HPET Table. The default value is [Disabled]. Please set this option to [Enabled] if you plan to use this motherboard to submit Windows® Vista $^{\text{TM}}$  certification.

# 3.4.4 Storage Configuration

### **Onboard IDE Controller**

Use this item to enable or disable the "Onboard IDE Controller" feature.

#### **Onboard SATA Controller**

Use this item to enable or disable the "Onboard SATA Controller" feature.

### **SATA Operation Mode**

Use this item to adjust SATA Operation Mode. The default value of this option is [IDE]. If you want to operate RAID function on SATA / SATAII HDDs, please select [RAID]. Configuration options: [IDE] and [RAID].

- \* If you select [RAID] mode, SATA / SATAII HDDs can not be accessed until you finish configuring RAID functions in NVIDIA BIOS / Windows RAID Utility.
- \* If you install OS on SATA / SATAII HDDs, please do not change the setting of this item after OS installation.

# **IDE Device Configuration**

You may set the IDE configuration for the device that you specify. We will use the "IDE1 Master" as the example in the following instruction, which can be applied to the configurations of "IDE1 Slave" as well.

#### **TYPE**

Use this item to configure the type of the IDE device that you specify. Configuration options: [Not Installed], [Auto], [CD/DVD], and [ARMD]. [Not Installed]: Select [Not Installed] to disable the use of IDE device.

[Auto]: Select [Auto] to automatically detect the hard disk drive.

After selecting the hard disk information into BIOS, use a disk utility, such as FDISK, to partition and format the new IDE hard disk drives. This is necessary so that you can write or read data from the hard disk. Make sure to set the partition of the Primary IDE hard disk drives to active.

[CD/DVD]: This is used for IDE CD/DVD drives.

[ARMD]: This is used for IDE ARMD (ATAPI Removable Media Device), such as MO.

### LBA/Large Mode

Use this item to select the LBA/Large mode for a hard disk > 512 MB under DOS and Windows; for Netware and UNIX user, select [Disabled] to disable the LBA/Large mode.

### **Block (Multi-Sector Transfer)**

The default value of this item is [Auto]. If this feature is enabled, it will enhance hard disk performance by reading or writing more data during each transfer.

### PIO Mode

Use this item to set the PIO mode to enhance hard disk performance by optimizing the hard disk timing.

#### DMA Mode

DMA capability allows the improved transfer-speed and data-integrity for compatible IDE devices.

### S.M.A.R.T.

Use this item to enable or disable the S.M.A.R.T. (Self-Monitoring, Analysis, and Reporting Technology) feature. Configuration options: [Disabled], [Auto], [Enabled].

### 32Bit Data Transfer

Use this item to enable 32-bit access to maximize the IDE hard disk data transfer rate.

# 3.4.5 PCIPnP Configuration

Setting wrong values in this section may cause the system to malfunction.

# **PCI Latency Timer**

The default value is 32. It is recommended to keep the default value unless the installed PCI expansion cards' specifications require other settings.

#### PCI IDE BusMaster

Use this item to enable or disable the PCI IDE BusMaster feature.

# 3.4.6 Super IO Configuration

#### **Serial Port Address**

Use this item to set the address for the onboard serial port or disable it. Configuration options: [Disabled], [3F8 / IRQ4], [2F8 / IRQ3], [3E8 / IRQ4], [2E8 / IRQ3].

#### **Parallel Port Address**

Use this item to set the address for the onboard parallel port or disable it. Configuration options: [Disabled], [378], and [278].

# Parallel Port Mode

Use this item to set the operation mode of the parallel port. The default value is [ECP+EPP]. If this option is set to [ECP+EPP], it will show the EPP version in the following item, "EPP Version". Configuration options: [Normal], [Bi-Directional], and [ECP+EPP].

### **EPP Version**

Use this item to set the EPP version. Configuration options: [1.9] and [1.7].

### **ECP Mode DMA Channel**

Use this item to set the ECP mode DMA channel. Configuration options: [DMA0], [DMA1], and [DMA3].

### Parallel Port IRQ

Use this item to set the IRQ for the parallel port. Configuration options: [IRQ5] and [IRQ7].

# 3.4.7 USB Configuration

# **USB Controller**

Use this item to enable or disable the use of USB controller.

### **USB 2.0 Support**

Use this item to enable or disable the USB 2.0 support.

### **Legacy USB Support**

Use this option to select legacy support for USB devices. There are four configuration options: [Enabled], [Auto], [Disabled] and [BIOS Setup Only]. The default value is [Enabled]. Please refer to below descriptions for the details of these four options:

[Enabled] - Enables support for legacy USB.

[Auto] - Enables legacy support if USB devices are connected.

[Disabled] - USB devices are not allowed to use under legacy OS and BIOS setup when [Disabled] is selected. If you have USB compatibility issue, it is recommended to select [Disabled] to enter OS.

[BIOS Setup Only] - USB devices are allowed to use only under BIOS setup.

### **USB Keyboard/Remote Power On**

Use this item to enable or disable USB Keyboard/Remote Power On on the system.

# **USB Mouse Power On**

Use this item to enable or disable USB Mouse Power On on the system.

# 3.5 Hardware Health Event Monitoring Screen

In this section, it allows you to monitor the status of the hardware on your system, including the parameters of the CPU temperature, motherboard temperature, CPU fan speed, chassis fan speed, and the critical voltage.

### **CPU Quiet Fan**

This item allows you to control the CPU fan speed and fan noise. If you set this option as [Disabled], the CPU fan will operate in full speed. If you set this option as [Enabled], you will find the items "Target CPU Temperature" and "Target Fan Speed" appear to allow you adjusting them. The default value is [Disabled]. You are allowed to enable this function only when you install 4-pin CPU fan.

### **Target CPU Temperature**

The target temperature will be between  $45^{\circ}$  C/113 $^{\circ}$ F and  $65^{\circ}$  C/149 $^{\circ}$ F. The default value is [ $50^{\circ}$  C/122 $^{\circ}$ F].

# **Target Fan Speed**

Use this option to set the target fan speed. You can freely adjust the target fan speed according to the target CPU temperature that you choose. The default value is [Fast]. Configuration options: [Fast], [Middle] and [Slow].

# 3.6 Boot Screen

In this section, it will display the available devices on your system for you to configure the boot settings and the boot priority.

# 3.6.1 Boot Settings Configuration

### **Boot From Onboard LAN**

Use this item to enable or disable the Boot From Onboard LAN feature.

# **Boot Up Num-Lock**

If this item is set to [On], it will automatically activate the Numeric Lock function after boot-up.

# 3.7 Security Screen

In this section, you may set or change the supervisor/user password for the system. For the user password, you may also clear it.

# 3.8 Exit Screen

### Save Changes and Exit

When you select this option, it will pop-out the following message, "Save configuration changes and exit setup?" Select [OK] to save the changes and exit the BIOS SETUP UTILITY.

### **Discard Changes and Exit**

When you select this option, it will pop-out the following message, "Discard changes and exit setup?" Select [OK] to exit the BIOS SETUP UTILITY without saving any changes.

### **Discard Changes**

When you select this option, it will pop-out the following message, "Discard changes?" Select [OK] to discard all changes.

### **Load BIOS Defaults**

Load BIOS default values for all the setup questions. F9 key can be used for this operation.

# **Load Performance Setup Default**

This performance setup default may not be compatible with all system configurations. If system boot failure occurs after loading, please resume optimal default settings. F5 key can be used for this operation.

### **Load Power Saving Setup Default**

Load power saving setup default. F6 key can be used for this operation.

# 4. Software Support

# 4.1 Install Operating System

This motherboard supports various Microsoft® Windows® operating systems: 7 / 7 64-bit / Vista™ / Vista™ 64-bit / XP / XP 64-bit. Because motherboard settings and hardware options vary, use the setup procedures in this chapter for general reference only. Refer to your OS documentation for more information.

# 4.2 Support CD Information

The Support CD that came with the motherboard contains necessary drivers and useful utilities that enhance the motherboard features.

# 4.2.1 Running The Support CD

To begin using the support CD, insert the CD into your CD-ROM drive. The CD automatically displays the Main Menu if "AUTORUN" is enabled in your computer. If the Main Menu did not appear automatically, locate and double click on the file "ASSETUP.EXE" from the BIN folder in the Support CD to display the menus.

### 4.2.2 Drivers Menu

The Drivers Menu shows the available devices drivers if the system detects the installed devices. Please install the necessary drivers to activate the devices.

### 4.2.3 Utilities Menu

The Utilities Menu shows the applications software that the motherboard supports. Click on a specific item then follow the installation wizard to install it.

# 4.2.4 Contact Information

If you need to contact ASRock or want to know more about ASRock, welcome to visit ASRock's website at <a href="http://www.asrock.com">http://www.asrock.com</a>; or you may contact your dealer for further information.
